Impactful Storytelling

- Hands-on experience with the design process and industry best practices, encompassing extensive research, design thinking, specification analysis, and final prototyping.
 - Expertise includes product design, testing, prototyping, and utilizing a wide range of user research methodologies and design standards.
- Excel in identifying early-stage pain points and constraints of target users, providing enhanced design and product solutions.
 - Worked across various domains, building products for both B2B and B2C enterprise applications.
